

Aluminum Frame Mountain Bike

The Totem mountain bike is designed for off-road adventures and recreational riding. Featuring a lightweight aluminum frame, it offers a balance of durability and agility.

Overview

High-Performance Aluminum Mountain Bike

This 26-inch mountain bike is engineered with a lightweight alloy frame, providing an optimal balance of durability and agility for off-road trails and recreational riding. Equipped with a reliable hydraulic disc braking system and a versatile 27-speed drivetrain, it ensures precise control and smooth gear transitions across varied inclines. Designed for comfort and performance, the bike features a front suspension fork to absorb terrain impact, making it an excellent choice for outdoor enthusiasts.
