

Aluminum Handle Claw Hammer

This claw hammer features a durable aluminum handle that reduces weight. The hammerhead is made from hardened steel, offering excellent strength for various construction and DIY tasks.

Product Overview

Professional Grade Claw Hammer

This high-quality claw hammer is engineered for durability and ease of use in professional construction and woodworking environments. Featuring a lightweight aluminum handle, it significantly reduces user fatigue during extended work sessions while maintaining robust structural integrity. The forged hardened steel head ensures excellent strength and resistance to wear, making it a reliable tool for demanding tasks.

Technical Specifications

Handle Material	Aluminum
Head Material	Hardened Steel
Key Features	Ergonomic Design, Lightweight, Wear Resistant, Forged Steel

Applications

Suitable For

- Construction
- Woodworking
- DIY Projects
