

Aluminum Hollow Wall Anchor

Aluminum hollow wall anchor designed for secure fastening in drywall and hollow base materials. It features a threaded stud for easy installation and a corrosion-resistant finish for durability.

Product Overview

Secure Fastening for Hollow Walls

This aluminum hollow wall anchor is engineered for reliable and secure fastening in drywall and other hollow base materials. Featuring a robust threaded stud design, it allows for straightforward installation while maintaining high holding strength. Its corrosion-resistant finish ensures long-term durability, making it an ideal choice for mounting shelves, fixtures, and various decorative items.

Technical Details

Material	Aluminum
Corrosion Resistance	Yes
Installation Mechanism	Threaded stud

Applications

Common Applications	Drywall mounting, Shelving installation, Fixture mounting, Hollow base materials
