

# Aluminum Mast Aerial Work Platform

This aluminum mast lifting platform offers a versatile and lightweight solution for elevated work. Constructed from high-strength aluminum alloy, it ensures durability and corrosion resistance.

## Overview

### Versatile Aluminum Mast Aerial Work Platform

This aluminum mast lifting platform is a versatile, lightweight solution designed for elevated work in confined spaces. Constructed from high-strength aluminum alloy, the unit offers exceptional durability and corrosion resistance while maintaining easy maneuverability. Equipped with essential safety features such as outriggers and emergency stop buttons, it provides a stable and secure platform for maintenance, installation, and inspection tasks in construction and warehousing environments.

## Technical Specifications

### Model Specifications

Model	Platform Height (m)	Working Height (m)	Rated Load (Kg)
SYLO (III) -10	10	12	300
SYLO (III) -12	12	14	300
SYLO (III) -14	14	16	300
SYLO (III) -16	16	18	260

## Performance

### Power Requirements

**2.2 KW**

Motor Power

**220 V AC**

Auxiliary Power

## Features

### Key Features

Lightweight Aluminum Alloy, Corrosion Resistant, Telescopic Mast, Emergency Stop System, Outrigger Safety Support, Compact Design
