

Aluminum Motor Mounting Frame

Durable aluminum mounting frame designed for electric motors. It features a robust three-spoke design for secure motor attachment and vibration dampening.

Product Overview

Precision Engineered Motor Support

This durable aluminum mounting frame is expertly designed for secure electric motor attachment. Featuring a robust three-spoke architecture, it is engineered to provide superior vibration dampening and optimal alignment stability. With multiple mounting points for versatile installation, this frame is a reliable solution for various industrial motor applications.

Technical Specifications

Compatibility

Electric Motors • Versatile Installation

Material

Cast Aluminum

Design Features

Three-spoke design, Vibration dampening, Precision-engineered, Multi-point mounting

Model Identifier

168-23
