

# Aluminum Oxide Abrasive Cloth Roll

This aluminum oxide cloth roll is designed for sanding and finishing applications. Its durable aluminum oxide grain is bonded to a flexible cloth backing, making it suitable for both hand and machine sanding.

## Product Overview

### Versatile Abrasive Solution

This aluminum oxide abrasive cloth roll is engineered for high-performance sanding and finishing tasks across a wide variety of materials. Featuring a durable grain bonded to a flexible cloth backing, it provides the resilience needed for both heavy-duty and fine surface preparation. Its roll format allows operators to cut custom-sized strips, effectively reducing material waste and streamlining workflow efficiency in professional workshop environments.

## Technical Details

Abrasive Grain	Aluminum Oxide
Backing Material	Flexible Cloth

## Applications

Compatible Surfaces	Metal, Wood, Plastic
