

Aluminum Oxide Bench Grinder Wheel

This bench grinder wheel is made from aluminum oxide. It is designed for efficient material removal and sharpening across various grinding applications.

Product Overview

High-Performance Grinding Solution

This aluminum oxide bench grinder wheel is engineered for efficient material removal and precision sharpening tasks. Designed for consistent and reliable performance, it is an essential tool for maintaining cutting edges in workshops and industrial environments. Its durable construction ensures long-lasting operation across various grinding applications.

Technical Specifications

Max Operating Speed

35 m/s

Speed

Abrasive Material	Aluminum Oxide
Grit Rating	36#

Dimensions

Available Dimensions (mm)

Diameter (mm)	Thickness (mm)	Arbor Hole (mm)
150	12.7	16
200	25.4	25

Applications

Recommended Uses	Material Removal, Tool Sharpening, Industrial Grinding, Workshop Maintenance
