

Aluminum Oxide Coated Abrasive Roll

This abrasive roll features aluminum oxide and a closed coat. The X-cloth backing provides high strength and low stretch for wood and metalworking applications, including steel drawbenches.

Product Overview

High-Performance Abrasive Roll

The TA131X Aluminum Oxide Coated Abrasive Roll is engineered for consistent material removal and surface finishing. Featuring a durable X-weight cotton backing, this abrasive is designed to withstand rigorous sanding and grinding applications. Its versatile grit range makes it an essential tool for professional surface preparation tasks.

Technical Specifications

Product Code	TA131X
Abrasive Grain	Aluminum Oxide (A)
Backing Material	X-wt CL Cotton
Bonding	Resin over Resin (R/R)
