

Aluminum Oxide Coated Abrasive Roll

This coated abrasive roll features special aluminum oxide and a flexible cloth backing. It offers good toughness and low stretch for demanding material removal applications on metal and wood.

Product Overview

High-Performance Coated Abrasive Roll

This aluminum oxide coated abrasive roll is engineered for demanding material removal applications across various industries. Featuring a durable J-weight cotton backing and precision-graded grain, it ensures consistent cutting action and extended service life. The resin-over-resin bonding system minimizes heat generation, making it an ideal choice for automated sanding and grinding processes on metals, wood, and composites.

Technical Specifications

Available Widths

- 1400mm
- 1650mm

Model Code	TA122J
Abrasive Grain	Aluminum Oxide
Backing Material	J-weight Cotton
Bonding	Resin over Resin (R/R)
Grit Range	P60 - P1000
