

Aluminum Oxide Coated Abrasive

This coated abrasive features special aluminum oxide and a semi-closed coat. It is designed with an E-paper backing and antistatic properties for woodworking applications.

Product Overview

High-Performance Coated Abrasive

The PA239E aluminum oxide coated abrasive is engineered for demanding industrial applications requiring consistent material removal. Featuring a durable E-weight paper backing and a robust resin-over-resin bonding system, this abrasive delivers an excellent cut rate and long service life. It is highly versatile, making it suitable for sanding metals, wood, and composites in both manual and automated operations.

Technical Specifications

Available Widths

- 1250 mm
- 1400 mm
- 1650 mm

Product Code	PA239E
Backing Material	E-weight paper
Abrasive Grain	Aluminum Oxide (A)
Bonding System	Resin over Resin (R/R)
Available Grit Range	P40 - P1000
