

Aluminum Oxide Sanding Discs for Sanders

These aluminum oxide sanding discs are designed for use with orbital sanders. They feature a durable abrasive for effective material removal and a consistent finish on wood, metal, and plastic.

Overview

High-Performance Sanding Solution

These aluminum oxide sanding discs are engineered for high-performance material removal and consistent finishing on orbital sanders. Designed with an integrated dust extraction hole pattern, they ensure a cleaner workspace, improved visibility, and extended abrasive lifespan. These versatile discs are suitable for professional applications across wood, metal, and plastic surfaces.

Technical Specifications

Surface Compatibility

- Wood
- Metal
- Plastic

Abrasive Material	Aluminum Oxide
-------------------	----------------

Compatible Tools	Orbital Sanders
------------------	-----------------

Features

Key Benefits

Efficient Removal • Consistent Finish • Extended Lifespan

Dust Extraction	Yes
