

Aluminum Oxide Sanding Discs with Hook and Loop

These aluminum oxide sanding discs are designed for efficient material removal and surface preparation. They feature a hook and loop backing for quick disc changes and a 6-hole pattern for effective dust extraction.

Product Overview

Professional Aluminum Oxide Sanding Discs

These high-quality aluminum oxide sanding discs are engineered for efficient material removal and precise surface preparation. Featuring a flexible design and a reliable hook and loop backing, they allow for rapid tool changes and excellent contour following. The integrated 6-hole pattern ensures consistent dust extraction, making them an ideal choice for clean and effective work on metals, woods, and paints.

Technical Specifications

Attachment System

Hook and Loop • Velcro-style

Abrasive Material

Aluminum Oxide

Dust Extraction Design

6 holes

Application & Compatibility

Usage Requirements

- Requires backing pad
- Compatible with 6-hole sanders

Suitable Surfaces

Metal, Wood, Paint
