

Aluminum Oxide Sanding Sponge

This sanding sponge features aluminum oxide grain on four sides for extra strength. It can be used wet or dry on drywall, wood furniture, and metal furniture.

Product Overview

Professional Grade Sanding Sponge

This aluminum oxide sanding sponge is designed for versatility and durability in professional finishing tasks. Featuring a four-sided abrasive design, it offers long-lasting performance and can be conveniently washed and reused. Suitable for both wet and dry applications, it ensures a consistent finish across various materials including wood, metal, and plaster.
