Product Overview

Professional Abrasive Solution

This high-quality aluminum oxide sandpaper roll is engineered for consistent performance across a wide range of industrial and craft applications. Featuring a durable E-weight paper backing, it offers superior tear resistance and extended service life, making it suitable for both hand sanding and machine applications. An integrated anti-clogging coating helps maintain consistent cutting performance, ensuring efficient material removal and a high-quality finish on various substrates.

Technical Specifications

Surface Compatibility

- Wood
- Plywood
- Metal
- Leather
- Paint Surfaces
- Plastic

Abrasive Material	Aluminum Oxide
Backing Material	E-weight Paper
Available Grits	P150, P400

Features

Key Features

Anti-clogging coating • Tear resistant • Machine compatible • Hand-sanding ready

Primary Applications

- Abrasive belt conversion
- Surface polishing
- Imperfection removal
- Pre-stain preparation
