

Aluminum Oxide Waterproof Abrasive Cloth Roll

This abrasive cloth roll features high-grade aluminum oxide grain on a Y-WT cloth base. Its waterproof and oilproof design makes it suitable for polishing stainless steel, steel, copper, and other metals.

Product Overview

Industrial Grade Abrasive Solutions

This premium aluminum oxide abrasive cloth roll is designed for high-performance sanding on wood, metal, and various industrial surfaces. Engineered for durability, the waterproof cloth backing ensures consistent performance in demanding applications. The roll format offers excellent versatility, allowing operators to easily dispense and cut precise lengths for belt sanders or manual sanding tasks.

Technical Specifications

Grit	60
Abrasive Material	Aluminum Oxide
Backing Material	Waterproof Cloth
Model Identifiers	Y-871M, V-871M

Performance Features

Suitable Materials

- Wood
- Metal
- Industrial Components

Key Features

Waterproof • Industrial Grade • Cut-to-Length
