

Aluminum Paste Ball Mill

This ball mill is designed for making aluminum paste and aluminum powder. It ensures consistent particle size reduction and homogeneous mixing for high-quality aluminum-based products.

Product Overview

Precision Milling Technology

This specialized ball mill is engineered for the high-efficiency production of aluminum paste and aluminum powder. Designed for both laboratory and small-scale industrial applications, the unit ensures consistent particle size reduction and superior homogeneous mixing. Its robust construction guarantees durability, while its precise engineering meets rigorous quality and safety standards for chemical processing.

Certifications

Quality Compliance

ISO 9007 • TÜV SÜD • RoHS • SGS

Technical Specifications

Operational Capabilities

4000 RPM

Capacity

Primary Application

Aluminum Paste, Aluminum Powder, Chemical Processing
