Overview

High-Efficiency Aluminum Power Solution

This portable power bank features a durable aluminum casing and supports advanced Power Delivery (PD) and Quick Charge (QC) protocols for rapid energy transfer. Designed for versatility, it is available in 10000mAh and 20000mAh capacities to suit various usage needs, from daily commutes to extended travel. With universal compatibility, it efficiently charges smartphones, tablets, and even high-power devices like laptops and gaming consoles.
