

# Aluminum Pressure Cooker for Efficient Cooking

This aluminum pressure cooker is designed for efficient and safe cooking. It features a durable construction, secure locking mechanism, and pressure release valve for optimal performance.

## Overview

### Professional Aluminum Pressure Cooker

This high-performance pressure cooker is engineered from premium aluminum alloy, featuring a polished surface for durability and easy maintenance. Designed with comprehensive safety in mind, it includes multiple protection mechanisms such as a spring valve, alarm valve, and pressure limit valve. It is an ideal solution for commercial or heavy-duty cooking environments requiring consistent and efficient results.

## Technical Specifications

### Working Pressure

**80 Kpa**

Working Pressure

### Safety Mechanisms

- Automatic safety device (opening/closing)
- Spring valve
- Alarm valve
- Pressure limit valve
- Emergency safety outlet

### Material & Finish

Aluminum Alloy, Polished Surface

## Models & Capacity

### Available Models

Model	Diameter	Capacity
CPC-15L	32CM	15L
CPC-18L	34CM	18L
CPC-23L	32CM	23L

## Options

### Optional Features

Anodized colorful lid • Induction base
