Product Overview

Professional Grade Aluminum Pressure Cooker

This high-quality aluminum pressure cooker is engineered for efficient and safe culinary performance. Crafted from durable aluminum alloy, it features an oxidation-treated surface that is both scratch and abrasion resistant, ensuring long-term durability in demanding kitchen environments. With an eight-core safety protection system, this cooker offers peace of mind while preserving essential nutrients and flavors in your meals.

Material & Construction

Material	Aluminum Alloy
Surface Treatment	Oxidation Surface, Scratch Resistant, Abrasion Resistant

Safety Features

Safety Systems

8 Core Protection • Pressure Release Valve • Secure Locking Mechanism

Design & Ergonomics

Key Components

- Silicone sealing ring
- Pressure release valve
- Secure locking side handles

Grip Type	Ergonomic Handles
