

Aluminum Profile Double Head Cutting Saw

This double head cutting saw is designed for cutting aluminum profiles with high precision. It features two saw heads that can operate simultaneously, increasing efficiency.

Product Overview

High-Precision Aluminum Cutting Solution

The Aluminum Profile Double Head Cutting Saw is engineered for high-precision cutting of aluminum profiles, making it an essential tool for mass production environments. Featuring dual saw heads that operate simultaneously, this machine significantly enhances manufacturing efficiency for aluminum doors, windows, and curtain walls. It includes an integrated digital display for precise angle settings and cutting length control, ensuring consistent quality across all production runs.

Technical Specifications

Model Number	SHZ2-120 x 3600
Number of Saw Heads	2
Operation Mode	Simultaneous

Features

Control Interface

Digital Display

Suitable Applications

Aluminum Doors, Aluminum Windows, Curtain Walls
