

Aluminum Rafter Square

This is an aluminum rafter square with laser etched markings for high visibility. The solid aluminum body features CNC machined edges for greater accuracy and durability.

Product Overview

Professional Grade Rafter Square

This aluminum rafter square is designed for high-precision carpentry, roofing, and framing applications. Engineered with a solid aluminum body and CNC-machined edges, it provides superior accuracy and long-term durability on the job site. The laser-etched markings ensure high visibility for quick and reliable measurements.

Technical Specifications

Construction Material	Solid Aluminum
Machining Technique	CNC Machined
Measurement Markings	Laser Etched

Applications

Primary Applications	Carpentry, Roofing, Framing, General Layout
