

Aluminum Spring Snap Hook Connector

This aluminum snap hook is a versatile and durable connector. Constructed from lightweight yet strong aluminum, it features a spring-loaded gate for secure and easy attachment.

Product Overview

Versatile Aluminum Connector

This aluminum spring snap hook is engineered as a durable and lightweight connector suitable for a wide range of industrial and commercial applications. Featuring a reliable spring-loaded gate mechanism, it ensures secure and rapid attachment while maintaining a snag-free design. Its robust construction provides dependable performance under load, making it an ideal choice for integration into various hardware systems.

Technical Specifications

Material	Aluminum
Gate Mechanism	Spring-loaded
Key Features	Lightweight, Durable, Snag-free finish, Spring-loaded gate

Applications

Industry Usage

- Electronics Information Products
- Computer Peripherals

Specific Component Use

Monitors
