Product Overview

Professional Grade Wire Rope Ferrules

These high-quality aluminum ferrules are engineered for creating secure, reliable loop terminations in wire rope and cable assemblies. Manufactured in strict accordance with EN 13411-3 (DIN3093) standards, they offer excellent corrosion resistance and strength for demanding applications. Designed with a smooth, burr-free finish, these ferrules ensure efficient crimping and cable protection, making them ideal for rigging, lifting, and general cable securing tasks.

Technical Standards

Compliance Standard	EN 13411-3 (DIN3093)
Available Sizes	#1 to #60

Material & Construction

Finish
Smooth • Burr-free

Material	Aluminum Alloy
----------	----------------

Applications

Typical Applications	Rigging, Lifting, Cable securing, Cable assemblies
