

American Type Ball Pein Hammer with Wooden Handle

This ball pein hammer is the American type, featuring a polished steel head. It is equipped with a wooden handle for a comfortable and secure grip.

Product Overview

American Type Ball Pein Hammer

This American-style ball pein hammer features a high-quality polished steel head paired with a durable wooden handle. It is engineered for versatile metalworking tasks, including shaping metal, riveting, and striking punches or chisels. The dual-purpose design includes a ball pein end for rounding edges and a flat face for general hammering applications, offering a comfortable and secure grip for professional use.
