

American-Type Stoning Hammer with Half Plastic-Coated Handle

This stoning hammer features a durable steel head, ideal for shaping and breaking stone. The half plastic-coated handle provides a comfortable and secure grip for stonemasons, construction workers, and DIY enthusiasts.

Product Overview

American-Type Stoning Hammer

The American-Type Stoning Hammer is a robust tool engineered for precision breaking and shaping of stone. Featuring a durable steel head, it is designed to withstand demanding construction and masonry environments. The handle is equipped with a half plastic-coated grip, which is specifically designed to improve user comfort, reduce fatigue, and enhance control during repetitive tasks. This tool is an essential addition for professionals seeking reliable performance and efficient force transfer in demolition or masonry applications.
