

# Amplified Indoor HDTV Antenna

This amplified indoor HDTV antenna receives over-the-air digital TV signals. It has adjustable gain control for optimal signal reception and includes VHF and UHF elements.

## Product Overview

### Professional Indoor Signal Solution

This amplified indoor HDTV antenna is specifically engineered to enhance the reception of over-the-air digital television signals. It features integrated VHF and UHF elements and a built-in amplifier to effectively boost signal strength while minimizing noise interference. Designed for versatility, its compact footprint allows for seamless integration into any room, providing a reliable solution for areas with challenging signal conditions.

## Technical Specifications

### Key Features

- Integrated signal amplifier
- Adjustable gain control knob
- Front panel power indicator
- Compact design for indoor placement

Supported Frequencies	VHF, UHF
-----------------------	----------

Gain Adjustment	Yes
-----------------	-----

## Compatibility

Device Compatibility	Most HDTVs and digital TV receivers
----------------------	-------------------------------------
