

Analog Timer for Industrial Automation

This analog timer is designed for precise time control in industrial applications. It features a clear dial for easy time setting and a robust enclosure for durability.

Product Overview

Precision Time Control

The H3BA/ST4P is a compact analog timer engineered for high-precision time management in industrial environments. Featuring a clear, intuitive dial for easy time setting and a robust, durable enclosure, this unit ensures reliable performance in demanding automation systems. It is specifically designed for panel mounting, making it an ideal solution for process control and applications requiring accurate time-based operations.

Technical Specifications

Suitable Applications

- Industrial Automation
- Process Control
- Time-based Operations

Timing Settings

10 h

Max Time Range

Model Number

H3BA/ST4P

Mounting Style

Panel Mount

Key Features

Compact Design, Analog Dial, Robust Enclosure, High Precision
