

Anchor Handling Supply Vessel

This versatile maritime vessel is designed for offshore support operations. It features a spacious deck for cargo, powerful winches for anchor handling, and advanced navigation systems.

Overview

Versatile Maritime Support

The 80M Anchor Handling Supply Vessel is a robust maritime solution engineered for complex offshore support operations. It features a spacious deck for efficient cargo transport and is equipped with powerful winches specifically designed for anchor handling and towing tasks. With integrated dynamic positioning (DP) capabilities, the vessel ensures precise maneuvering and station keeping in challenging marine environments.
