

Angle Die Grinder

This pneumatic tool is designed for grinding, polishing, and deburring in hard-to-reach areas. It features a compact right-angle head for accessibility and a powerful air motor for efficient material removal.

Overview

Professional Angle Die Grinder

The RP7315 is a compact, pneumatic angle die grinder engineered for precision grinding, polishing, and deburring in confined spaces. Designed with user comfort in mind, its lightweight build minimizes fatigue during extended industrial use, while the industrial-grade P6 bearing ensures high precision and longevity. The tool features a safety trigger mechanism to prevent accidental activation and a silencer cover to reduce noise pollution, making it a reliable choice for automotive and metalworking applications.

Performance Metrics

Rated Speed

20000 RPM

Free Speed

Collet Capacity

3mm, 6mm

Technical Specifications

Motor Structure

Four-blade motor structure for higher speed

Bearing Quality

Industrial grade P6

Noise Control

Yes

Safety & Ergonomics

Safety Mechanisms

- Trigger insurance design prevents accidental touch
- Safety lever throttle

Ergonomic Design

Mini type, lightweight construction to prevent fatigue

Accessories

Included Equipment

- 3mm chuck
- 6mm chuck
- Special disassembly wrench
