

Angle Grinder

This angle grinder is designed for cutting, grinding, and polishing various materials. It features a powerful motor and ergonomic design.

Product Overview

Professional Performance and Durability

This high-performance angle grinder is engineered for demanding professional tasks including cutting, grinding, and polishing. Its robust construction ensures long-term durability in intensive work environments. The tool features an ergonomic design to maximize operator comfort and a high-power motor to handle tough materials efficiently.

Key Features

Primary Applications

- Metal Cutting
- Surface Grinding
- Material Polishing

Safety and Protection

Wheel Guard, Spindle Lock
