

# Angle Grinder Flap Wheel with Quick-Lok

Angle grinder flap wheels are designed for deburring and grinding applications. They feature a quick-lok system for easy attachment and come in various grit sizes.

## ADDITIONAL IMAGES

## Product Overview

### Professional Quick-Lok Flap Wheels

These professional-grade flap wheels are engineered for high-performance grinding and surface preparation across metalworking and wood-working applications. Featuring an innovative quick-change thread arbor system, these wheels allow for seamless transitions between abrasive types to optimize production efficiency. Designed with robust construction to ensure extended service life, they support a wide range of tasks from coarse material removal to fine surface polishing.

## Technical Specifications

### Operating Performance

**12200 r/min**  
Maximum RPM

**80 m/s**  
Maximum Speed

### Standard Dimensions

Metric	Imperial
125mm x 20mm x M14	5" x 3/4" x 5/8"-11

### Compatible Abrasive Materials

Alumina, Zirconia, Ceramic Alumina, Silicon Carbide

## Compliance and Safety

### Safety Standards

EN 13743 • ANSI 87.1 • OSHA Compliant

### Safety Recommendations

- Use only with mounting flange
- Wear proper eye, face, body, and respiratory protection
- Consult power tool manufacturer's manual before use
- Use proper guards at all times
