

Angle Grinder Power Tool

The angle grinder is a handheld power tool used for grinding, cutting, and polishing. It utilizes a motor that drives a rotating abrasive disc and features an adjustable guard and side handle.

Product Overview

Professional Performance Angle Grinder

This high-performance angle grinder is a versatile handheld power tool engineered for professional-grade grinding, cutting, and polishing tasks. Designed with safety and control in mind, it features an adjustable guard and an ergonomic side handle to ensure stability during operation. It is an essential asset for construction and fabrication environments, effectively working on diverse materials including metal, concrete, and tile.

Technical Features

Primary Functions

- Grinding
- Cutting
- Polishing

Supported Materials

Metal, Concrete, Tile

Safety & Design

Safety Components

- Adjustable safety guard
- Ergonomic side handle for control
