

Angle Grinder Tool

This angle grinder is designed for cutting, grinding, and polishing various materials. It features a robust motor for demanding applications and an ergonomic design for comfortable handling.

Product Overview

High-Performance Angle Grinder

This robust angle grinder is engineered for demanding tasks, including grinding metal and precise groove cutting. It is versatile enough to handle stone material cutting when equipped with a diamond cutting blade. Designed with a rear switch for operational control, it provides reliable performance for professional metalworking and construction applications.

Technical Specifications

Rated Power

780 W

Rated Power

Rated Speed

11000 R/MIN

Power Supply

220V~ / 50Hz

Disc Diameter

100mm, 115mm

Features & Applications

Primary Applications

- Metal Grinding
- Groove Cutting
- Stone Cutting

Design Features

Rear Switch • High Power Motor
