Overview

Professional Angle Measurement Solution

This comprehensive series of angle measuring tools is designed to provide precise and convenient measurements for various workpieces. By combining the functions of a ruler and a goniometer, these tools significantly improve workflow efficiency across woodworking and metalworking applications. Each tool is CNC machined to ensure high accuracy and repeatability for professional-grade results.

Key Features

Core Benefits

180 °

Measurement Range

2 in 1

Functions

Manufacturing & Durability

Manufacturing Process

CNC Machined, Laser Etched Graduations, Anodized Finish

Material & Finish

Aluminum with black anodized anti-rust finish

Technical Specifications

Included Tools

- Digital Angle Finder
- Protractor
- Combination Square
- Multi-angle Measuring Tool

Measurement System

Metric • Degrees

Protractor Scale

0 to 180 degrees

Applications

Primary Applications

- Setting bevels
- Marking angles
- Ensuring precise cuts
- Seat cuts marking
- Plumb and Jack cuts

Industry Suitability

Woodworking, Metalworking, Engineering
