Product Overview

Professional Grade Angle Valve

This angle valve is engineered for durability and reliability in both plumbing and HVAC applications. Featuring a high-quality chrome-plated brass body, it offers superior corrosion resistance for long-term performance. Designed for easy operation, the quarter-turn handle provides smooth flow control, making it an essential component for connecting water supply lines to fixtures like sinks, toilets, and faucets.

Technical Specifications

Inlet Connection	1/2" NPT Male
Outlet Connection	3/8" Compression
Product Code	Y00548
Operation Type	Quarter-turn

Construction & Materials

Material	Chrome-plated brass
Key Features	Corrosion Resistant, Durable Construction, Easy Shut-off

Applications

Suitable For

- Plumbing systems
- HVAC&R systems
- Toilet water supply
- Sink and faucet connections
