

Angular Contact Ball Bearing

This angular contact ball bearing is ISO9001 and ISO/TS16949 certified. It is made from ESR steel material and designed for use in high-precision rolling mills.

Product Overview

Double Row Angular Contact Ball Bearings

These double row angular contact ball bearings are engineered with a filling slot design to provide robust performance in demanding industrial applications. Constructed from high-quality chrome steel with a durable steel cage, they are built for reliability and longevity. Available in various precision grades and sealing configurations, these bearings are suitable for a wide range of mechanical assemblies requiring high load capacity and smooth operation.

Technical Specifications

Precision Grades

P0 • P6 • P5

Material	Chrome Steel
Bearing Cage	Steel Cage
Contact Angle	32°, 35°
Sealing Options	Open, ZZ, 2RS

Quality & Compliance

Quality Standards	ISO9001
