

Animal Feed Production Line

This feedstuff line is an industrial-grade machinery system designed for processing and producing animal feed. The system's design allows for precise control over the feed formulation, ensuring high-quality and nutritionally balanced animal feed.

ADDITIONAL IMAGES

Product Overview

Industrial Feed Production Solution

This animal feed production line features a reasonable, compact structure designed for efficient processing. It is engineered to produce between 3000 and 10000 tons of powder or pellet feed annually, making it an ideal choice for small to medium-scale feed factories and cultivation facilities. The system offers broad adaptability, allowing users to switch between poultry, livestock, and fish feed production based on specific market demands.

Operational Performance

Annual Production Capacity

3000 T

Minimum Capacity

10000 T

Maximum Capacity

Compatible Feed Types

Poultry Feed, Livestock Feed, Fish Feed, Powder Materials, Pellet Feed

Installation & Maintenance

Installation & Maintenance Profile

- Convenient installation process
- Easy to operate
- Low maintenance cost
- Small footprint
- Low workshop requirements
- Low investment cost

Control System

Control System Features

- Electric control simulation screen
- Common control interface
- Integrated over-loading protection devices
