

ANSI 125 Screw Type Non-Rising Stem Gate Valve

This ANSI 125 screw type gate valve features a non-rising stem design suitable for various industrial applications. It is designed to control the flow of fluids in pipelines.

Overview

ANSI 125 Non-Rising Stem Gate Valve

This ANSI 125 screw type gate valve features a non-rising stem design, engineered for reliable flow control in various industrial pipeline applications. Its durable construction ensures long-term performance, while the compact non-rising stem configuration makes it an ideal solution for installations where space is limited. Conforming to ANSI standards, this valve provides excellent compatibility and interchangeability for professional fluid management systems.

Technical Specifications

Standard	ANSI 125
Connection Type	Screw Type
Stem Design	Non-Rising Stem
Available Sizes	2" - 4"
Valve Category	Gate Valve
