

ANSI 54-2 Brown Porcelain Strain Insulator

This brown porcelain strain insulator is designed for power engineering applications. It provides reliable insulation and mechanical strength for strain loads.

Product Overview

ANSI 54-2 Strain Insulator

This high-voltage porcelain strain insulator is engineered to meet ANSI 54-2 standards, providing exceptional mechanical strength and electrical insulation for power distribution applications. Constructed with durable materials and featuring a hot-dip galvanized surface treatment, it ensures long-term reliability in demanding outdoor environments. Its robust design is specifically optimized for strain loads, making it a dependable component for overhead line infrastructure.

Technical Specifications

Tensile Strength

60 KN

Tensile Strength

Surface Treatment

Hot Dip Galvanized

Model Type

54-2

Material

Malleable/Ductile Iron

Color

Brown

Logistics & Shipping

Packaging

Export fumigation-free wooden case lined with plastic film

Shipping Options

Air, Boat, Truck, TNT, DHL

Commercial Terms

Payment Options

- T/T (30% in advance, 70% after B/L)
- L/C
- Credit Card
- Western Union
