

ANSI 60 Type A Roller Chain Sprocket

This ANSI 60 Type A roller chain sprocket is designed for optimal power transmission. Featuring hardened teeth and robust construction, it offers long-lasting service and efficient operation.

Product Overview

Industrial Grade Roller Chain Sprocket

The ANSI 60 Type A roller chain sprocket is a precision-engineered component designed for optimal power transmission and long-term durability. Built to strict ANSI standards, this sprocket ensures reliable performance and seamless compatibility within diverse industrial machinery and conveyor systems. Its construction features hardened teeth, providing superior wear resistance even under demanding operational conditions.

Technical Specifications

Chain Standard	ANSI 60
Sprocket Type	Type A (Plate Sprocket)
Material Features	Hardened Teeth, Wear Resistant, Industrial Grade

Applications

Common Applications

- Machinery
- Conveyor Systems
- Power Transmission Systems
