

ANSI B16.47 Forged Flange

This is a forged flange manufactured to meet ANSI B16.47 standards. It is designed for use in piping systems to connect pipes, valves, pumps, and other equipment.

Product Overview

ANSI B16.47 Forged Flange

This forged flange is engineered to comply with ANSI B16.47 standards, ensuring reliability and compatibility in demanding piping systems. Designed for high-pressure and high-temperature environments, it provides a robust, leak-proof connection for pipes, valves, and pumps. With extensive customization capabilities for large-scale industrial applications, this component is built for durability and precision.

Technical Specifications

Outer Diameter Range	9000 mm
Maximum Weight	40 tons
Maximum Thickness	800 mm
Maximum Height	1500 mm

Key Features

Design Highlights

- ANSI B16.47 Standard Compliance
- Raised face for secure gasket sealing
- Precision machined surface finish
- Large-scale forged construction

Suitable Applications

High-Pressure Systems, High-Temperature Environments, Piping Infrastructure, Industrial Valves, Pumps
