

Anti-Falling Robot Vacuum Cleaner with Remote Control

This robot vacuum cleaner efficiently vacuums dirt, debris, and pet hair from carpets and hard floors. It features a remote control, time scheduling, and an anti-falling system for avoiding stairs.

Product Overview

Professional Automated Floor Cleaning

This advanced robot vacuum cleaner provides an automated solution for maintaining clean carpets and hard floors. It features an integrated UV lamp for sanitization, mopping capabilities, and smart sensors for cliff avoidance and furniture protection. Designed for convenience, it includes a remote control, automatic charging base, and space isolation technology for precise cleaning control.
