

Antistatic Abrasive Grinding Disc

This antistatic abrasive grinding disc is designed for use with electric tools and accessories. It reduces static electricity build-up during use, enhancing safety and performance.

Product Overview

High-Performance Antistatic Grinding Disc

The KP52F antistatic abrasive grinding disc is engineered for professional grinding applications, specifically designed to minimize static electricity build-up during operation. This feature enhances both safety and operational efficiency when used with electric power tools. Available in multiple grit configurations, it provides a reliable solution for demanding surface preparation and material removal tasks.

Technical Specifications

Key Features

Antistatic • Electric Tool Compatible

Model Number

KP52F

Available Grit Sizes

P-30, P-50
