

Anvil Loppers for Branch Cutting

These anvil loppers are designed for cutting thick branches and stems. They feature a high-carbon steel blade and a durable anvil for efficient cutting.

Product Overview

Heavy-Duty Anvil Loppers

These heavy-duty anvil loppers are engineered for precision cutting of thick branches and stems. Featuring a high-carbon steel blade and a durable anvil, they ensure lasting sharpness and efficient performance. The long-handle design provides increased leverage to minimize user effort, while ergonomic grips ensure comfort during extended pruning tasks.

Technical Specifications

Blade Material	High-carbon steel
