

Anvil Loppers for Branch Cutting

These heavy-duty anvil loppers are designed for cutting thick branches and stems. They feature a durable steel construction with a hardened steel blade and long handles for increased leverage.

Product Overview

Professional Anvil Loppers

These heavy-duty anvil loppers are engineered for efficient cutting of thick branches and stems in gardening and landscaping applications. Built with durable steel construction and a hardened steel blade, they provide clean cuts while minimizing user fatigue. The extended handle design offers superior leverage, complemented by ergonomic grips for comfort during extended professional use.

Technical Specifications

Material Construction	Durable Steel, Hardened Steel Blade
Cutting Mechanism	Anvil
Handle Design	Long handles for increased leverage
Grip Type	Ergonomic

Usage

Primary Applications

- Gardening
- Landscaping
- Cutting thick branches
- Cutting stems
