

API 5CT Coated Steel Tubing

This API 5CT coated tubing is designed for demanding industrial applications. The outer diameter coating enhances durability and provides corrosion resistance.

Product Overview

API 5CT Coated Steel Tubing

This high-performance OCTG tubing is manufactured to rigorous API 5CT standards, ensuring reliability in demanding oil and gas environments. Featuring specialized ID and OD coatings using poly and epoxy resins, this tubing offers superior corrosion resistance and durability against harsh chemicals. Designed for optimal flow efficiency and long-term service life, it is an ideal solution for downhole applications and well construction projects.

Technical Specifications

Surface Treatment

- ID/OD Coating
- Poly Coating
- Epoxy Resin Coating

Standard	API 5CT
Size	20 inches (DN500)
Available Grades	13Cr, 22Cr, 25Cr

Logistics & Supply

Supply Capacity

5000 Metric Tons

Monthly Capacity

Payment Terms

T/T • L/C • D/A • D/P

Packaging	Customized according to client requirements
