

APKT11T308 Cemented Carbide Milling Inserts

CNC cemented carbide milling inserts suitable for machining steel, stainless steel, and cast iron. They offer good quality at a competitive price.

Product Overview

Precision Milling Performance

The APKT11T308 cemented carbide milling inserts are engineered for high-precision machining operations. These durable inserts are designed to provide consistent performance across various industrial applications, ensuring reliability and extended tool life. They are suitable for machining a diverse range of materials including steel, stainless steel, and cast iron.

Technical Details

Item Number	APKT11T308
Compatible Materials	Steel, Stainless Steel, Cast Iron
