

Apparel and Shoemaking Machinery

Machinery designed for the apparel and shoemaking industries. These machines facilitate various manufacturing processes in garment and footwear production.

Product Overview

Versatile Marking and Writing Solutions

This set of precision writing instruments is designed for diverse applications in apparel and shoemaking environments, where accurate marking is essential. Featuring a translucent, cylindrical design, these tools offer high visibility and ease of use for pattern drafting, material layout, and general administrative tasks. With five distinct colors included, users can easily color-code markings on various fabrics and materials to streamline production workflows.
