

Aquatic Fitness and Therapy System with Treadmill

This fitness system combines a full-size pool with integrated fitness components. It features an adjustable swim current and a hydraulically powered underwater treadmill, along with hydrotherapy jets.

Overview

Comprehensive Aquatic Fitness & Therapy

This dual-purpose system combines a high-performance swim current with integrated fitness components for a complete aquatic workout. It features a hydraulically powered underwater treadmill designed for low-impact cardiovascular exercise, alongside a dedicated spa area for post-workout recovery. This versatile solution is ideal for professional therapy centers and fitness facilities seeking to provide both high-intensity training and gentle rehabilitation.

Fitness Features

Swim Current System	Signature adjustable current for in-place swimming with variable speed and intensity
Underwater Treadmill	Hydraulically powered for low-impact walking, jogging, and running

Therapy & Wellness

Hydrotherapy System

Massage Jets • Relaxation Focused • Therapeutic Recovery
