Product Overview

High-Performance Cut Protection

These aramid fiber safety gloves are engineered for high-risk industrial environments, combining advanced anti-cut yarn with imported steel wire for superior durability. Featuring a reinforced cow split palm, they offer exceptional anti-slip and anti-puncture properties while maintaining an ergonomic fit for maximum dexterity. Designed for demanding tasks, these gloves are an essential safety solution for automotive assembly, glass handling, and other high-risk manufacturing sectors.

Technical Specifications

| | |
|----------------------|---|
| Material Composition | Aramid Fiber, Steel Wire, Cow Split Leather |
| Cuff Style | Knitted cuff |
| Available Sizes | One size fits all |

Compliance and Standards

Safety Standards

| Standard | Rating |
|---------------------|-----------|
| EN ISO 21420:2020 | Compliant |
| EN 388:2016+A1:2018 | 4544 |

Usage and Storage

Recommended Applications

- Automotive assembly
- Glass industry
- High-risk industrial environments

Storage Instructions

Store in a cool dark place, in its original packaging.
